

HYDRAULIC ONBOARD NETS CLEANING MACHINE

The onboard net cleaning machine is a cleaning tunnel with a passage of Ø10cm. This product works with the **onboard high pressure cleaning machine (ref: 850)**.

All types of nets (meshed and trammel), boltropes, ropes are manually hauled into the cleaning machine to eliminate the sand or algae and help maintain the nets original performances.

The nets passage into the tunnel can be automatised by using our **hydraulic nets transporter (ref 580)** placed behind the cleaning machine.

Photo non binding

This machine is built in composite materials and stainless steel. It is light (only 16kg) and fits on a tube of Ø60mm (not provided).
