

# AUTOMATIC NETS HAULER

This equipment is made of a plain rubberised drum, Ø 350 mm, which is reversible (enabling you to turn around the used drum) and a traction system of auto-centred band. This system provides a strong grip whilst leaving a lot of flexibility.

It has a hydraulic distributor and a pressure relief valve.

It can be placed on the bulkhead or on the deck (using a foot) and can be blocked in several positions.

REF	Pull (in kg)	Speed (m/min)	Flow (l/min)	Pressure (bars)		Power (in HP)	Weight (in kg)
