

LONGLINE HAULER

- ↪ It hauls automatically all types of longline (deep water and trolling), Ø1mm to Ø12mm.
- ↪ The longline haul is done through a system of auto-centred bands (**patented system**).
- ↪ There is no line distortion or line twisting.
- ↪ Automatic line coiling.
- ↪ Built in stainless steel and polyester, it has a hydraulic distributor and a pressure relief valve

OPTION: DAVIT ARM FOR POTS & LINES HAULER (ref 416610)

- ↪ The longline hauler becomes a pots and lines hauler by replacing the retractable line guide by a stainless steel rotating davit arm equipped of an open pulley to guide the warp.

| REF | Pull (in kg) | Speed (m/min) | Flow (l/min) | Pressure (bars) | | Power (in HP) | Weight (in kg) |
|------------|-----------------|------------------|-----------------|-----------------|------------|------------------|-------------------|
| | | | | Service | Max | | |
| 416 | 200 | 0 to 70 | 10 | 126 | 140 | 3,2 | 37 |
