

HYDRAULIC NETS HAULER ACOUPA Ø400

The hydraulic nets hauler ACOUPA has a drum in V shape Ø400mm, **width 330mm**, with some grooves. The grooves ease the hauling and hold the nets in place.

The space between the drum allows the retrieval of wider fish such as the acoupa.

Built in cast marine grade aluminium and stainless steel, it has a hydraulic distributor with a pressure relief valve.

This nets hauler is delivered with its installation foot which is fixed on the bulkhead of the boat. Connected to an hydraulic power pack, this fishing gear can be installed on all types of boats.
